

AMENDMENT  
Appln. No. 10/618,940  
Amendment dated February 3, 2006  
Reply to Office Action mailed October 6, 2005

**Amendments to the Specification:**

Please replace the paragraph beginning on page 4, line 20, with the following rewritten paragraph (deleted text being struck through and added text being underlined):

Each of a plurality of guides 24 is attached to an inner surface of the peripheral wall 16. Each of the guides 24 is vertically orientated and generally extends between the bottom wall 14 and the upper edge 18. The guides 24 are spaced from each other. Preferably, each of the guides 24 includes a pair of elongate members 26 spaced from each other. In the illustrative embodiment, particularly shown in Figures 2 and 3 of the drawings, each of the guides may be spaced from one of the end wall portions at a distance of approximately one quarter of the width of one of the side wall portions. As also shown in Figures 2 and 3, a pair of the guides that are positioned adjacent to one of the side wall portions may be spaced from each other a distance that is approximately equal to one half of the width of the side wall portion.
